1. Introduction

The backup Client is available in 2 versions:

The Lite version (red Icon) & the Pro version (Blue Icon)

The Lite version is more suitable for personal computers (Laptop & Desktop)

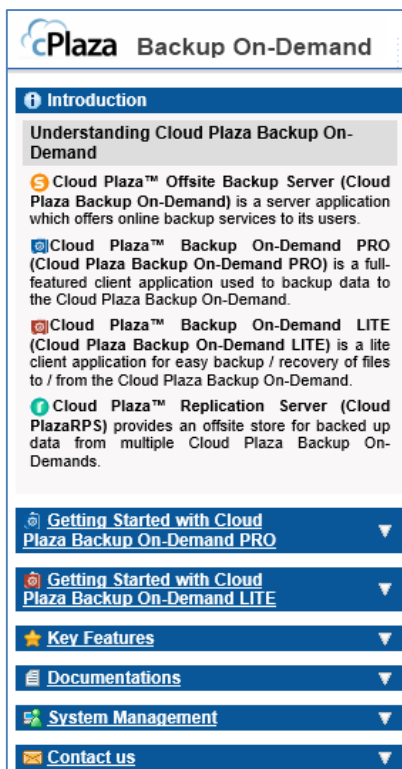

The Pro Version is more suitable for servers.

Both of those software Clients use a dedicated Java run Time environment which is installed at the same time. There is no software to install before the Backup Client.

2. Procedure

2.1 Backup lite:

- Browse to the following URL: <https://backup.cloudplaza.eu>

The screenshot shows the 'cPlaza Backup On-Demand' website. The main content area is titled 'Introduction' and contains the following text:

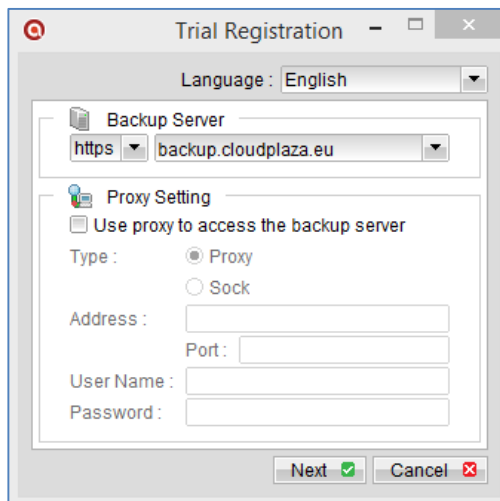

Understanding Cloud Plaza Backup On-Demand

- Cloud Plaza™ Offsite Backup Server (Cloud Plaza Backup On-Demand)** is a server application which offers online backup services to its users.
- Cloud Plaza™ Backup On-Demand PRO (Cloud Plaza Backup On-Demand PRO)** is a full-featured client application used to backup data to the Cloud Plaza Backup On-Demand.
- Cloud Plaza™ Backup On-Demand LITE (Cloud Plaza Backup On-Demand LITE)** is a lite client application for easy backup / recovery of files to / from the Cloud Plaza Backup On-Demand.
- Cloud Plaza™ Replication Server (Cloud PlazaRPS)** provides an offsite store for backed up data from multiple Cloud Plaza Backup On-Demands.

Below the text are several navigation links with dropdown arrows:

- Getting Started with Cloud Plaza Backup On-Demand PRO
- Getting Started with Cloud Plaza Backup On-Demand LITE
- Key Features
- Documentations
- System Management
- Contact us

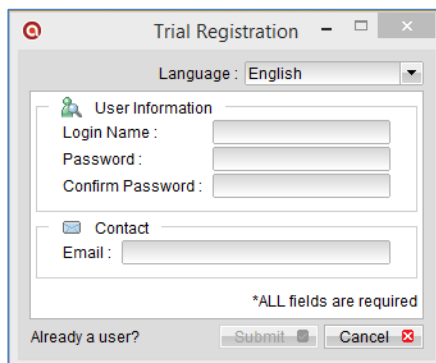

- Click on "Getting started with CloudPlaza Backup On-Demand Lite" to download the client software.
- Run the downloaded file "acb-win.exe" to start the installation (basically click next until the installation starts).
- When the installation has successfully finished, click "Next" in the Trial Registration window

The screenshot shows the 'Trial Registration' dialog box with the following fields and options:

- Language: English
- Backup Server: https backup.cloudplaza.eu
- Proxy Setting:
 - Use proxy to access the backup server
 - Type: Proxy, Sock
 - Address: [Empty field]
 - Port: [Empty field]
 - User Name: [Empty field]
 - Password: [Empty field]
- Buttons: Next (with green checkmark), Cancel (with red X)

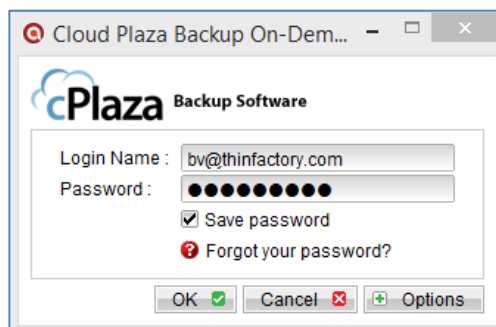

- Click on "Already a user?"

The screenshot shows the 'Trial Registration' dialog box with the following fields and options:

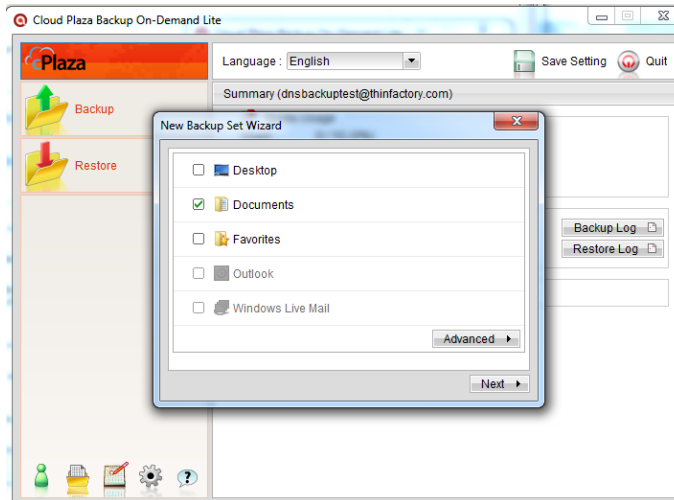

- Language: English
- User Information:
 - Login Name: [Empty field]
 - Password: [Empty field]
 - Confirm Password: [Empty field]
- Contact:
 - Email: [Empty field]
