-Logon to the provisioning portal (<https://portal.cloudplaza.eu>)

The screenshot shows a login page with the following elements:

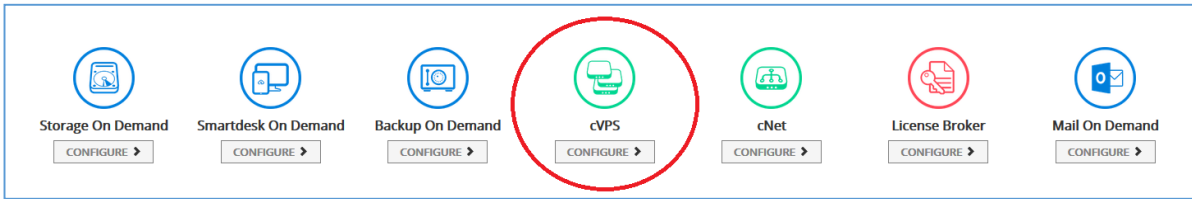

- Login** header
- Username** label and an empty text input field.
- Password** label and a password input field with masked characters (dots).
- Remember me** checkbox.
- Login** button.
- Or Using** section with a **MYDIGIPASS** logo and a **SECURE LOGIN** badge.
- Register** section with the text "if you don't have an account [click here](#)".

-Go to “my services”

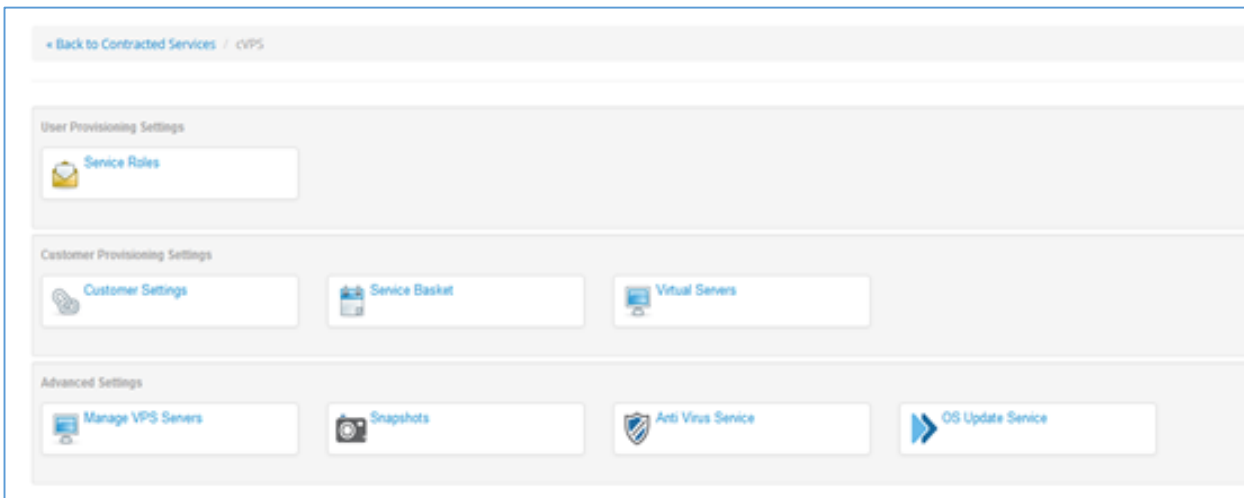

The screenshot shows a navigation menu with the following items:

- MY SETTINGS** (Section Header)
- [My Details](#)
- [My Tasks](#)
- [My Messages \(25 new\)](#)
- My Services** (Selected item, highlighted in blue)
- COMPANY SETTINGS** (Section Header)
- [Company Details](#)
- [Manage Users](#)
- [Create User](#)
- [Contracts](#)
- [Documents](#)
- [Configure Workflows](#)
- [Sites & Departments](#)
- [Company Workflow Users](#)
- [E-quotes](#)

-Choose CVPS/ configure

Choose “Manage VPS Server”

The Manage VPS control allows you to control your server as you were in front of it.

Action	Description
POWEROFF	Shutdown, simulation pressing poweroff button on server
POWERON	Boot the server
RESET	unplug the server
SHUTDOWN	Gracefull shutdown (via OS)
REBOOT	Gracefull reboot (via OS)

SHUTDOWN and REBOOT requires that the VMware tools are installed on the server!

If your server has a Device Public IP attached, the Public IP is shown on the right. Using the Icon, you start an RDP (Windows) or SSH (Linux) session towards your server
